Fine crystals are used to remove dead skin cells by intensive exfoliation and resurfacing. This stimulates blood flow and also the production of collagen and elastin, resulting in a more firmer, more youthful looking skin. Microdermabrasion can be used to treat fine lines, wrinkles, acne scarring, dull-tired skin, blackheads, uneven skin tone and pigmentation marks.

A block of treatments is recommended for best results, however you will see a difference immediately. If a block of four or more treatments are booked in advance you will receive a complimentary microdermabrasion treatment. Please note block bookings must be paid in full on the day of your first treatment to receive your complimentary treatment.
